

HOW TO FLIP A CLASSROOM AND LAND ON YOUR FEET

University of Queensland, December 7th 2013

WORKSHOP

The OLT project: **Flipping the Classroom** headed up by UQ Associate Professors Carl Reidsema, Lydia Kavanagh and Professors Philip Long with Purdue's David Radcliffe including USydney, RMIT, Purdue, Stanford and UPittsburgh invite you to come and share your questions and your expertise at this interactive "flipped" workshop.

The aims of the day are to:

- Explore the variety of understandings of and approaches to flipping the classroom, and plan for implementation and sustainability,
- Start to build a library of tools, advice and other resources to support flipped classrooms, and
- Create a community of practice for those interested in this field

The Workshop is designed to let you have the same experience that students in a flipped classroom have.

Whether you have already started flipping your classroom, are beginning to plan for such a move or just want to know what it's all about, you will gain something from this workshop.

Members of the international project team will take part in facilitation on the day.

Date	Saturday, 07 December 2013
Time	9:00am - 4:00pm
Room	Advanced Engineering Building
Location	University of Queensland (St Lucia)
Fees:	\$150
Connect:	(For those going on to the AAEE conference a bus will be provided at cost).
